## SFEC

"Often when you think you're at the end of something, you're at the beginning of something else."

*Fred Rogers*

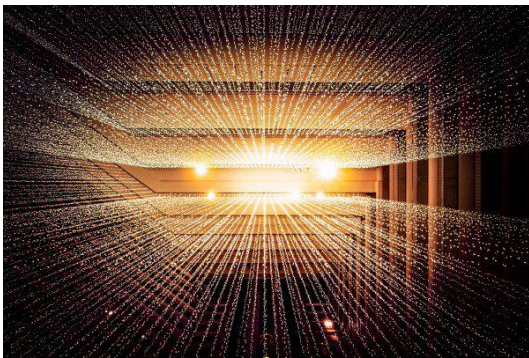

Our main objective is to initiate a replicable model of learning that enables enterprise centre managers, tenant businesses and learners to adopt sustainable and responsible business practices. Focusing on the dimensions of sustainable practice such as: sustainable buildings (NZEB), energy and resource efficiency, sustainable eco-systems and collective action, the [SFEC programme](#) will assist the participant cohort in developing practices that will make a transformative contribution to addressing climate challenges.

[Download our Best Practice Climate Action Compendium!](#)

Together the partners have collected 50+ inspirational case studies and best practice examples of how enterprise centres and hubs along with other public buildings are implementing or have already implemented innovative, sustainable and climate change programmes reducing their carbon footprint, improving their environmental practices and future proofing the infrastructure of their buildings.
